Environmental Policy

At GMAC we are committed to minimising our environmental impact. We continue to put measures in place to help us make sustainable environmental improvements, which we monitor on a regular basis.

In particular GMAC aims to:

1. Meet, and where practical, exceed all relevant regulatory requirements and minimise any adverse environmental effects caused as a result of our activities
2. Minimise, through strategic planning, the environmental effect of new developments
3. Promote recycling and the use of recycled materials, while reducing the consumption of materials wherever possible
4. Minimise waste in all operations, maintaining zero to landfill
5. Give consideration to the environmental effects of the materials we use, and wherever possible, use materials that can be recycled
6. Work with suppliers who have similar policies to minimise the impact of their operation on the environment
7. Include environmental issues in GMAC staff training programmes and encourage all staff to contribute to the implementation of sound environmental practices
8. Monitor progress and publish an environmental performance report on an annual basis
9. Measure our performance through KPIs
10. Ensure that all staff are aware of the environmental policy at Induction Training and through ongoing briefings
11. Build on our commitments through 'green' working groups and a 'live' action plan

Information on GMAC environmental policy and performance will be made available and regularly updated on our website:
