Venture Art Artists

KYZA KALU

This is my favourite digital artwork I have created, my character from Miitopia. I designed it using a computer programme, with different layers and adding colours. My advice to new artists is look up some reference images, stay calm and take your time. Listen to chilled out music whilst you are working.

Share the inspiration behind their artwork and their top tips for creating art

LIAM ASHWORTH

I'm quite proud of my Bleeding Love: Misheard Lyrics artwork. I've taken the lyrics and changed the lyrics slightly so they are "misheard" and now relate to food. I've used Procreate and images from the internet as the background which I've drawn on. My advice for other artists is If you have an idea in your head be confident in putting it down and sharing it with others. There will be other people out there with similar ideas and they will want to see your work!

AMY ELLISON

My Walking Dead artwork of Rick and Daryl is my favourite. I made it with my hands on Procreate. I looked at the image of them and then drew it on the Ipad. I like the black and white as it shows a strong image. My advice is that it's good if you like different things and it is good to draw your favourite things. Being an artist is really good because you get to make work you love.

Keep practising and it might be as good as mine!

Try using this step-by-step guide to draw some tulips, either using Procreate, Paint or on paper.

MICHAEL

Hello, I'm Michael Nash. I am an artist who has been attending Venture Arts since 2019. My favourite things are photography and doing cultural exchange placements with Royal Exchange Theatre and Peoples History Museum. I like to draw buildings on procreate. Artists who inspire me are Picasso, Leonardo da Vinci and digital media artists from Venture Arts. My artwork is amazing because I did lots of different techniques of art and I spent time thinking about different techniques and learning new skills. People think that my artwork looks amazing.

"Anyone can have fun creating something that they are proud of"

"Make artwork about things you like"

"Try digital artwork because it's my favourite thing to do and I find it easier and quicker than normal painting (and less messy)"

Venture Arts is an award winning visual arts organisation based in Hulme. We support people with learning disabilities to reach their full potential through visual arts and culture. Venture Arts' artists make new work in the studio in ceramics, textiles, photography, film, animation, sound, drawing, painting, 3D, mixed media and digitally. We also support our artists to undertake professional residencies, commissions and placements; and to share their work with audiences through exhibitions and participatory workshops.
